# ACCEPTANCE OF STATEMENT OF PRACTICE

**ASSISTANCE will only be provided to people who accept these terms and conditions.**

I agree to accept the terms and abide by the rules of the Association in accordance with the Constitution and as outlined below.

## STATEMENT of Practice

The Developing Foundation is a charitable, volunteer organisation created for the purpose of being "friends" of brain injured people.

Our main role is to support brain injured people and their families by undertaking the following objects as outlined in our constitution:

- To raise funds to assist brain injured people.
- To organise facilities which will assist brain injured people.
- To provide support which will enhance the quality of life for severely brain injured people and/or their families who care for such brain injured people in their family homes.
- To further the knowledge in the medical and therapeutic community about brain development and function with the objective of improving the rehabilitation of people affected by developmental delay and brain injury.
- To assist in the research into the prevention of developmental delays and subsequent neurological problems.
- To undertake such activities such as may be conducive to the achievement of the above objects.

The Developing Foundation appreciates that different people have different needs and require different levels of support. The Developing Foundation does not support the therapies and makes no comment on what is right or wrong for any particular person. Our job is to support families with any therapies they choose. The decision on which therapy to use must always be the decision of the families and The Developing Foundation will help families with whatever therapy is chosen. Whilst The Developing Foundation may have different theories, speakers, therapists coming to talk to our families to present ideas, these are for information only.
